Bachelor of Science in Agribusiness – Workforce Track

The Bachelor of Science in Agribusiness emphasizes the relationship between agricultural sciences and business. Agribusiness graduates enter careers including, but not limited to, farm/ranch managers, sales representatives, consultants, food scientists, and extension agents. The agribusiness curriculum also promotes the development of entrepreneurial skills. Upon completion of this degree,

- Students will be able to utilize current technology and employ sustainable farming techniques in a real-world setting.
- Students will be able to create presentations and farm management plans that articulate and apply financial, operational, organizational, and market knowledge of agricultural-related businesses and careers.
- Students will be able to demonstrate leadership practices that apply the biblical principle regarding the doctrine of work.
